## Welcome

Cattle Producers and friends,

On behalf of the Thiessen family, we would like to welcome and invite you to our 40th annual bull sale. This year marks our 68th year of raising and offering high quality balanced trait registered Angus bulls. Thank you for taking the time to review this catalog.

As I am writing this, we are calving in 50 to 60 degree weather in March! That is simply unheard of here in eastern Montana. But only a month ago we were calving in temperatures that were almost 100 degrees colder. It was a very long and trying 2 plus weeks of some of the worst calving we have ever experienced. As I have developed more and more of these gray hairs over the years, I have increasingly tried to find positives in the things that we do. Through that cold snap we had a cow that calved over a week early out in a pasture in the middle of the night. That calf should have been dead when I found it the next morning. The maternal instincts of the Angus cow are phenomenal, and she got that calf up and sucking and then straddled it to keep it warm. We have so many losses in agriculture that it is hard to not get drug down, but we need to celebrate and embrace our wins!

At Regency Acres Angus, our mission is to raise as labor free and forage efficient of a cow as possible and for that cow to be a predictable breeder. We breed for smart and sound cattle that can travel, cattle with length, volume and that extra rib, cattle that are easy fleshing, and cattle with longevity and are nice to be around. We want cows with good udders that take care of their calves, that have vigorous calves that get up quickly and get to suckling. We breed for cattle that are beefy, long, deep, and perform under a wide array of conditions. All of those things we select for and are things that are passed on through genetics. The genetics that are introduced into our herd are done so with much research and contemplation. We score our cattle on many little things that can make a big difference. With that said, one can look through the cattle and appreciate the depth and uniformity of the cattle and the progress that has been made.

The bulls have been developed on a high roughage ration designed for a 3 lb./day gain. This allows the bulls to develop and grow at their own pace without causing structural damage. They will be fertility tested prior to the sale. They have been given two rounds of foot rot vaccine.

The heifers are straight out of our registered replacements. The bottom 25% were already culled. They are developed on silage, chopped hay and a little bit of corn and run in a large pasture where they can get plenty of exercise. They are bangs vaccinated, freeze branded, have all their yearling shots and will be ready to go to work for you.

You're welcome to come view the bulls and heifers any time before the sale at the ranch. Videos of the bulls are posted on [DVAuction.com](http://DVAuction.com).

We look forward to seeing you on Friday, April 11th.

RON FRYE MARKETING  
406.600.7514

Welcome to the Thiessen's Regency Acres Annual Production Sale.

It is my pleasure to invite you to the annual bull sale at Regency Acres Angus, hosted by the Thiessen family. Their steadfast commitment to raising high-quality Angus cattle is evident in every aspect of their program, built on a foundation of integrity, hard work, and a genuine passion for the industry.

At Regency Acres, success is measured by the success of their customers. The Thiessens have dedicated themselves to producing seedstock that enhances profitability for commercial cattlemen. Their breeding philosophy is rooted in practical, performance-driven traits that contribute to longevity, soundness, and overall efficiency. Their goal is simple: to provide bulls that not only meet but exceed expectations in real-world conditions.

Longevity, structural soundness, and overall performance are key factors in selecting the right bulls for any program. At Regency Acres, these fundamentals remain at the forefront. The focus on calf survivability, weaning performance, and maternal traits ensures a well-rounded investment for buyers. Understanding the genetics behind your seedstock provider's cow herd is crucial, as their breeding decisions ultimately influence the future of your own operation.

Russ and Tyler continue to stand behind their program, committed to helping you find the right seedstock to move your herd forward. Their dedication to quality and customer success is evident in everything they do.

If I can be of any assistance leading up to the Regency Acres Bull Sale, please don't hesitate to reach out.

Warm regards,

Ron Frye

## *Helpful Hints for care of Herd Bulls*

Having herd bulls adapt to the environment they will be in is very important to the success of a breeding program. Whenever possible, the bulls should be fed the same type of forage they will eat in the breeding pasture for a minimum of two weeks before turn out. Their rumen operates with little bugs to break down the diet and different forages each have their own little bugs. About two weeks is the time required for the rumen to

adjust to a different diet. When a bull is turned out, he isn't thinking much about eating, so any advantage that you can give him will be beneficial to younger bulls.

Another trick for having a virgin bull ready is what we call "Jump-starting." If you have a cow or a heifer around that is cycling, put the bull with her. If he seems disinterested, put another bull in with the cow for him to observe. This should trigger his brain. When the bull appears interested, let him in and remove the other bull. Make sure a bigger bull doesn't start whipping on him, or that could defeat what you are trying to accomplish. It is rare that this procedure is necessary, but it is good insurance and, once the bull gets a taste of what his job is, he will be ready for those heifers.

When breeding season is finished, a reconditioning program for yearling bulls is good as they change their teeth at 18 to 24 months of age.

## When you buy from Regency you get ...

### Guarantee

Regency Acres is providing a first-year breeding season guarantee. Breeding season is defined as the 90-day period following turnout. Regency Acres guarantees all bulls selling to be fertile, sound breeders. If a bull is found to be infertile or an unsound breeder as diagnosed by a licensed veterinarian, a replacement bull of equal value will be provided or credit less salvage value will be issued. All bulls selling for \$3,500 or more will be guaranteed against breeding injury. All injuries must be diagnosed by a licensed veterinarian. Regency Acres reserves the right to have our vet inspect the injured bull. Please notify Regency Acres as soon as possible should any injury occur and prior to the bull being sold for salvage. This guarantee does NOT cover any treatable condition such as foot rot, pinkeye, lameness from fighting, etc. If neglect by the owner is shown, no credit will be issued. All claims must be made by September 30.

This is NOT a mortality guarantee. Mortality insurance will be available sale day.

### Registration Papers

All bulls selling are registered. Papers on the bulls will be transferred upon request.

The buyer has the option to register the heifers for an additional \$200 over the purchase price.

### Fertility and Physical Exam

Complete breeding soundness exams and semen evaluations have been conducted by High Plains Veterinary Clinic. Exam reports are available for inspection.

### Repeat Buyers and Volume Discounts

Anyone that buys a bull that has also purchased a bull in 2023 and 2024 will receive a 5% discount on their total purchase price. Volume discounts are as follows:

- 5% on 5 or more bulls
- 10% on 10 or more bulls

### Johnnes Disease or "That damn sh<sup>xxx</sup>ing disease!"

Johnnes, formerly considered a dairy disease, is becoming very prominent across the beef herds. If you don't know what it is, get your phone out and Google it. We started hearing about this in herds around here a few years ago. This prompted us to test our herd for this devastating disease. At that time the State veterinarian was implementing a program for Johnnes and we enrolled. Since then, we have tested all females 3 years old and older and all bulls 2 years and older with all tests being negative. We are now a certified Johnnes-Free herd.

As your seedstock supplier, we felt it was necessary to do this to give you the peace of mind when buying from us.

### Sight-Unseen Purchase Guarantee

Buyers unable to attend the sale may call or send their bids in to Russ, the auctioneer or any of the representatives listed. If the bull(s) purchased are not as presented, the purchased bull(s) can be returned to Regency Acres at no cost to the buyer.

### EPDs:

The EPDs are current as of March 7, 2025. Current EPDs can be found at [Angus.org](http://Angus.org).

### Calving Ease Scores:

- 1 Star – Use on mature cows
- 2 Star – Use on cows 3 years old and older
- 3 Star – Could be used on heifers but be ready to assist
- 4 Star – Very little, if any, assistance should be necessary
- 5 Star – Very easy calving; no assistance should be necessary

### Free Delivery

Free delivery on bulls to CENTRAL POINTS (stockyards, etc.) within 1000 miles, or the nearest Canadian port of entry, on all bulls selling for \$4000 or more. A \$50 credit will be given if you pick your bulls up at the stock yards sale day or within a week of the sale at the ranch. **If you can't take delivery of your bull by May 1st**, we will feed them until you can come pick him up for \$2.50/head/day.

Commercial heifers are the responsibility of buyer as soon as sold. If you need help with trucking we can be of assistance.

Dam to Lot 1

A True calving ease herd bull out of the highly sought after \$132,000 Vermilion Riverside. This Riverside son might be one of the highest performing heifer bulls on the market this spring given his 75-pound birthweight, 825-pound weaning weight, 1300-pound yearling weight, and a very exciting EPD package. On test, this bull had an ADG ratio of 106. RA Riverside 451 is backed by 13 generations of dams with an average weaning ratio of over 100.

*Deep, soggy made Riverside herd bull with a stylish look to him, This bull really turned it on in the feedlot with his 118 average daily gain ratio. 453 has a true herd bull appearance with his tremendous amount of masculinity, his depth of rib, and his muscle. His dam is a real pretty and nice uddered six-year-old cow.*

# MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating your cattle with AngusLink<sup>SM</sup> programs: AngusVerified<sup>SM</sup> and the Genetic Merit Scorecard<sup>SM</sup>. AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day. The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

Users of the AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

AngusVerified and the Genetic Merit Scorecard are administered by IMI Global.

Dam to Lot 9

Maternal Sister to Lot 9

**HERD BULL ALERT!** We are starting off the first of the Revolutions with a dandy. 4109 may be the heaviest muscled and longest bull in the sale. Moderate in stature with a wide stance out of a beautiful Success daughter. Don't let the birthweight scare you on this one. We have found that top producing high-performance cows tend to throw a little more birthweight. This calf has truly stood out since May.

Another cow that went way over her gestation. Last year for some reason unknown to me we had a week where the cows went over and had big calves. We're certain the only time you will notice this birthweight is sale day.

*Thank you, thank you to our customers!*

The image features a full-page background of a distressed American flag. The flag's colors are heavily textured and weathered, with the red and white stripes appearing dark and grungy. The blue canton in the upper right corner is filled with numerous small, white, five-pointed stars. Centered over the lower half of the flag is the text "In God We Trust" in a black, elegant cursive script.
